exe or whatever i think u should have a video when u go into town u should be able to buy spells i think but if someone could make a guide for this then that would be nice More props and better quality! You're a great modder and the way you've made my little hours more fun is greatly appreciated. If you ever feel like looking for another character then know that I'll be your first port of call. All the best! Good pick. It's fine and all, but I would like to see some tutorials on how to play the mod. I think making people aware of how to play can benefit a lot of people and this mod could be a help for that. That's what I was thinking, but I'm not very good with videos. Also, you can just go into settings and turn tutorial off. Great Mod! Had this idea in my head for some time. I can't find any documentation on the tutorials though. Forgive me if this has already been mentioned, but I couldn't find it. I didn't try anything because I really wanted to test the gameplay. I've been using this mod for a while. I've

added my own version of the tutorials so they're more in-depth and speak the language of the mod. The mod is very good. I only have one problem with it. I can't decide if I want to turn the enemies off so that I can play the mod more freely. I'm not sure if the tutorials will be less advanced if the enemies are off. I think the enemies are necessary to the game. Is this fair? Thank you for taking the time to make this, I don't have much to say. This is good but i have two suggestions. 1) You should make a different kind of sound file that the way you sound in the actual game, for example instead of listening to your sound if you want to play 82157476af
